第 1 頁

1. In a recent survey of computer ownership, 73.4% of the respondents indicated they own PC computers, while 21.8% indicated they own both PC and Mac computers, and 80.1% said they own at least one of the two computers.
 - (a) What is the probability that a respondent owns a Mac computer? (5%)
 - (b) Given that a respondent owns a PC, what is the probability that the respondent also owns a Mac? (5%)
 - (c) Are events "P" and "M" mutually exclusive? Why or why not? Explain using probabilities. (2%)
 - (d) Are the two events "P" and "M" independent? Explain, using probabilities. (2%)
2. The following table shows part of the probability distribution for a random variable x .

x	$f(x)$
0	0.2
1	?
2	0.15
3	?
4	0.15

 - (a) The mean of the above distribution is known to be 1.8. Determine $f(1)$ and $f(3)$. (10%)
 - (b) Compute the variance and the standard deviation for the above probability distribution. (6%)
3. The time it takes a mechanic to change the oil in a car is exponentially distributed with a mean of 5 minutes.
 - (a) What is the probability that it will take a mechanic less than 6 minutes to change the oil? (5%)
 - (b) What is the probability that it will take a mechanic between 3 and 5 minutes to change the oil? (5%)
 - (c) What is the variance of the time it takes to change the oil? (5%)
4. An automobile manufacturer stated that it will be willing to mass produce electric-powered cars if more than 30% of potential buyers indicate they will purchase the newly designed electric cars. In a sample of 500 potential buyers, 160 indicated that they would buy such a product. At 95% confidence, what is your conclusion? Should the

manufacturer produce the new electric powered car? (10%)

5. In order to improve the grades of students at UTC, several incentive programs have been introduced. Results of random samples of grades from after and before the incentive programs are given below.

	After incentives	Before incentives
Sample Size	14	12
Sample Mean	2.85	2.61
Sample Standard Deviation	0.40	0.35
Sample Mode	2.5	3.0

At a 0.1 level of significance, test to determine whether the incentive programs have significantly increased the average grades. (10%)

6. A sample of 25 families was taken. The objective of the study was to estimate the factors that determine the monthly expenditure on food for families. The independent variables included in the analysis were the number of members in the family (X_1), the number of meals eaten outside the home (X_2), and a dummy variable (X_3) that equals 1 if a family member is on a diet and equals 0 if there is no family member on a diet. The following results were obtained.

	Coefficients	Standard Error
Intercept	450.08	53.6
X_1	49.92	9.6
X_2	10.12	2.2
X_3	-0.60	12.0

Analysis of Variance (ANOVA)

	DF	SS	MS
Regression	?	3,078.39	1,026.13
Residual (Error)	?	2,013.90	95.90
Total	?	?	

- (a) Write out the estimated regression equation. (3%)
- (b) Complete the ANOVA table. (4%)
- (c) Test for the significance of β_1 , β_2 , and β_3 at the 1% level of significance. (6%)

第 2 頁

- (d) Test whether or not there is a significant relationship between the monthly expenditure on food and the independent variables. Use a 0.01 level of significance. Be sure to state the null and alternative hypotheses. (5%)
- (e) Compute the coefficient of determination and explain its meaning. (4%)
- (f) Estimate the monthly expenditure on food for a family that has 4 members, eats out 3 times, and does not have any member of the family on a diet. (3%)
7. Babies weighing less than 5.5 pounds at birth are considered "low-birth-weight babies." In the United States, 7.6% of newborns are low-birth-weight babies. The following information was accumulated from samples of new births taken from two counties.

	Hamilton	Shelby
Sample size	150	200
Number of "low-birth-weight babies"	18	22

Develop a 95% confidence interval estimate for the difference between the proportions of low-birth-weight babies in the two counties. Is there conclusive evidence that one of the proportions is significantly more than the other? If yes, which county? (10%)
