1. Please explain what a Giffen good is in term of evaluating substitution and income effects. (20%)

2. Suppose Boeing and Airbus are both considering expanding their plant capacity as a strategic move but can't observe their opponent's move until their own move has been determined.

The followings are the companies' time-discounted values of all future profit streams in billion of dollars.

		Expand	Don't expand
Boeing	Expand	(0.40, 0.30)	(1.20, 0.60)
	Don't expand	(0.60, 1.50)	(1.0, 0.90)

Which strategies are Nash equilibriums? (20%)

3. In a certain industry, the supply curve of any firm is

$s_i(p) = p/2$. If a firm produces 5 units of output, what are its total variable costs? (20%)
